## **Call for Expression of Interest “Postdoctoral Research Fellow Position in Epidemiology or Biostatistics”**

### *General Description of the Project*

The Department of Hygiene and Epidemiology at the University of Ioannina School of Medicine invites expression of interest and applications for a Postdoctoral Research Fellow.

The Fellow will also get involved in exciting research initiatives within the Department including projects in clinical, molecular and environmental epidemiology and systematic reviews which offer the opportunity for meaningful professional growth, mentoring, and achievement. Some of the collaborative efforts where the Fellow will be included are the Epirus Health Study, the Childhood Leukemia International Consortium (CLIC), the COVID-19 Host Genetics Initiative, and the Genomics of MusculoSkeletal traits Translational Network (GEMSTONE). The grant supports opportunities for training, career development and collaboration with various European research groups (workshops, conferences and networking activities) and has a duration of 18 months.

### *General Description of the Department*

The Department of Hygiene and Epidemiology was founded in 1979 and its internationally-recognized expertise is on research methodology, evaluation of epidemiologic bias and evidence synthesis methods. The citation impact of the department’s publications is among the highest in Europe across any scientific discipline. There are currently five faculty members working in the Department and approximately 30 research or clinical fellows at various levels in their careers.

### *Qualifications*

Applicants should have a PhD in Epidemiology or Biostatistics. Extended experience with statistical analysis and/or evidence synthesis methodology are required. A Medical Degree or a degree in life sciences or equivalent is an advantage. Applicants should also have excellent written and verbal communication skills in English. After the induction period, the post holder is expected to be able to carry out independently research projects related to systematic reviews and population-based studies.

Applications should include a CV in English, contact details for two academic or professional referees, and a cover letter with a personal statement (about half a page) describing your suitability and motivation.

For more information and applications please contact Professor Evangelia Ntzani at [entzani@uoi.gr](mailto:entzani@uoi.gr).

Closing date: June 15, 2022
